

# DANIEL JESULOBA AJIDE

**Full-Stack Software Engineer** | React | Node.js | TypeScript | MongoDB | Laravel

+2348104618586 | jesulobadaniel1@gmail.com | [Github](#) | [LinkedIn](#)

## Professional Summary

Full-Stack Software Engineer with 5+ years of experience building scalable web applications using React, Next.js, Node.js, TypeScript, Laravel, and MongoDB. Experienced in designing user-focused interfaces, developing RESTful APIs, integrating backend services, and deploying production-ready applications. Proven ability to take products from concept to deployment while collaborating with cross-functional teams and delivering maintainable, high-quality software for startups, businesses, and enterprise environments.

## Core Skills

**Languages:** JavaScript, TypeScript, Python, PHP

**Frontend:** React.js, Next.js, Redux, Tanstack Query, TailwindCSS, Styled Components

**Backend:** Node.js, Express.js, Laravel, REST APIs, JWT Authentication

**Databases:** MongoDB, MySQL

**Tools:** Git, GitHub/Bitbucket, Jira, Postman, Render, Fly.io, Netlify

## Experience

### PuissantDev | Full Stack Developer Sep 2024 - Present

- Built and deployed multiple responsive business websites and client-facing digital products from the ground up, managing the full stack independently.
- Developed production applications using React, TailwindCSS, Redux, TypeScript, Node.js, MongoDB, and Emotion; maintaining consistent code quality and component reusability across projects.
- Designed and integrated REST APIs, optimizing request handling and reducing load times across multiple client interfaces.
- Worked closely with designers and backend engineers to ship polished, high-performance web experiences on schedule.

### TorofinOS | Full Stack Developer Mar 2026 - Present

- Developed core features for Workspace, an internal productivity platform supporting task management and workflow automation.

- Built frontend interfaces and backend services for a retail mall management platform serving small business operations.
- Contributed to application architecture with emphasis on scalability, maintainability, and long-term product growth.

#### **Lincoln University College | Full Stack Developer Aug 2025 - Present**

- Contributed to building and maintaining the university's website, admin dashboard, and student portal used by academic and administrative staff daily.
- Built accessible, responsive user interfaces with React and TailwindCSS while integrating backend functionality with Laravel
- Improved page performance, accessibility scores, and data management workflows across the institution's digital platforms.

#### **NIIT | Python & Web Development Tutor (Private) Mar 2024 – Jul 2024**

- Delivered hands-on training covering Python, HTML, CSS, JavaScript, and Git to students with varied technical backgrounds.
- Mentored students through practical projects and debugging, customizing material to match individual learning speeds.

### **Education**

**B.Sc. Information Technology** - Lincoln University College (Scholarship Recipient)

**Diploma in Software Engineering** - National Institute of Information Technology, Abuja  
Distinction | Awarded for excellence in Web Development
